Related Experience

Web Developer for Syracuse University Division of Marketing

July 2017 - Present

900 South Crouse Ave. Syracuse, NY 13244

- Produced and maintained multiple websites including syracuse.edu, calendar.syracuse.edu and a WordPress theme used by a multitude of *.syr.edu websites
- Remediated accessibility issues following WCAG 2.0 guidelines
- Developed accessible and responsive front-end and back-end solutions for Wagtail and Wordpress
- Migrated syracuse.edu from WordPress to Wagtail preserving all the data and design
- Worked with the system administrators to automate deployments using Gitlab's CI/CD pipelines and Docker
- Mentored, trained and managed student employees
- Collaborated with team members through Gitlab and Zoom in and out of the office
- Created an events calendar with a read and write REST API with WordPress and The Events Calendar plugin

Senior Front-end Developer for Mower

June 2014 - May 2017

211 W Jefferson Street, Syracuse, NY 13202

- Utilized latest Javascript frameworks and tools including React, React Redux, and Webkit to develop the single page app that served as the task management system for Mower
- Coordinated with PHP developers who built a secure REST API for the front-end to send and receive data for the task management system.
- Developed responsive wordpress templates with team members using HTML, CSS, Sass, Susy, and Grunt
- Worked to streamline front-end workflow by setting up Grunt to compile SASS and minify code for deployment

Web Developer for Rounded LLC

March 2013 - March 2014

235 Harrison St #100, Syracuse, NY 13202

- Produced both the front-end and back-end for web applications and sites on desktop and mobile environments
- Developed back-end solutions for complex web applications using Wordpress, PHP and Ruby on Rails
- Worked with the Google Maps, Facebook and Twitter APIs to build socially rich user experiences
- Collaborated with team members through github and by shouting at them from across the room

Skills

Python, Django, Wagtail, Javascript, Vue, PHP, Wordpress, HTML, CSS, Photoshop, Illustrator, and Git.
